

AIRCON

Grease Filters Mesh-Type

Stock & Custom

Standard and Custom Sizes

- functional design traps 98% inflammable particles!
- protects blower systems and blower system motors.

aluminum filters (model no. a-5)

Aluminum framed channel construction holds layers of crimped aluminum media.

All filters have crimped layers of media (Galvanized, stainless steel or aluminum) enclosed around perimeter of frame of same material.

galvanized and stainless steel filters (model no. a-6)

Rugged all steel construction with all steel frame to surround and encase steel filter media.

performance

Extreme laboratory tests show capabilities of this type filter to be outstanding and highly competitive.

98% of inflammable particles are trapped in the filter to reduce fire hazard.

Protects motors and blower systems with its high filtering efficiency capabilities.

Will out-perform many competitive economy-oriented filters.

made-to-order custom filters

Special size filters for your specific requirements may be ordered.

Write or call factory for quotation.

Furnish dimensions & thickness.

easy maintenance

Loading capacity of filter is completely renewed when it is washed and cleaned.

filters

Can be equipped with bale handles or lock handles (please specify with your order)
